

Explanation of this form

Purpose

NWO has a Code for Dealing with Personal Interests. This code was first implemented on 1 July 2019 and replaced with an improved version on 1 June 2020. The evaluation of and decision-making process regarding grant applications submitted to NWO may not be influenced by any form of bias whatsoever. To ensure that the participants involved in this process do not allow any personal interests they may have to influence the task they are performing, NWO asks them to indicate possible personal interests for each application. We therefore ask you to fill out the Project Participants sheet.

Please list all the persons actively involved in the intended project, their organisations and their roles in the application according to the instructions below.

Who to include in the list

Main applicant : this is the person who is indicated as the main applicant in the application form and budget form and submits the application in ISAAC.

Co-applicant(s) : these are all co-applicants included in the application form and budget form. They are also entered in ISAAC.

Co-funder(s) : these are all businesses and civil society organisations acting as co-funders with at least 1 employee actively involved in the intended project per co-funder. Co-funders are included in the application form and budget form. They are not listed in ISAAC.

Who not to include in the list

Collaborative partners : these are included in the application form but **not** in the budget. They do not need to be listed in this form.

Important notice

When submitting the grant application, only the names of individuals known at that time for the positions included in the budget should be listed. Additional rows may be added to the table as needed to ensure all relevant information is included.
